Predicting 28-day mortality from the response to an initial session of prone positioning in intubated patients

David M. Hannon

Introduction

I will just play with some units here.

123

120°

$32\text{kg}\,\text{m}/\text{s}^2$

Figures

Now a little play with figures.

Figure 1: Prone positioning

Tables

Models	Metric 1			Metric 2
	precision	recall	F-score	R@10
model 1	0.67	0.8	0.729	0.75
model 2	0.8	0.9	0.847	0.85

Table 1: Gravimetric analysis of silver halides in a 1.27-mL sample of sea water.

Models	Metric 1			Metric 2
	precision	recall	F-score	R@10
model 1	0.67	0.8	0.729	0.75
model 2	0.8	0.9	0.847	0.85

Table 2: second
